November 10, 2025 at 5:06a.m.: On Another Immediate Intrusion into our Peace and its Content

On the very next word, I am experiencing additional intrusion from vehicles passing by and planes passing over head to signal the advancement of its its content.

The time is 5:05 in the morning while I am completing this work and vehicles are driving past my home to directly coincide with the words that I am writing into my computer.

This time, the word is Rhachab.

So, I have worked on two words this morning and the sky is now rumbling in agreement with my writings again. This is my daily life as I live, work, dine, sleep, and constantly experience the unlawful and completely un-reserved illegal spying presence of the United States government in my home under the leadership of Donald Trump, a convicted felon.

I am certain that this marks a new low in what is publicly known about the extent of erosion that America has experienced in the form of its rule of law.

Apparently, there is no lawful remedy by which I can receive justice or relief from an absolutely unwanted and feloniously harmful level of spying intrusion (and interaction!) with my life from the obsessive compulsive 'all seeing eye' that resides inside of the United States government, military and the worldwide Freemason network.

I spend far too much time recording these details, but it is important that I document this harmful intrusion for historical purposes and for public knowledge.

For the record: the peeping toms are agitating the sky, and driving vehicles past our home to coincide with the following expressions - Bô'az and Rhachab.

This has become our daily life. I have been documenting this form of perverted and abusive intrusion into our home for four years now. I have contacted every form of legitimate 'power' that exists in the USA, and have not received any positive response whatsoever.

I am left with no other conclusion than **the USA government has become overtaken and overthrown by an evil power and that the rule of law is merely an illusion designed to keep the masses at bay while America is raped and looted from within**. I, obviously, have nowhere that I can go to receive any form of help for this ongoing and deeply troubling intrusion into our home from Donald Trump and his team of worldwide spies.

I am writing these recordings in hopes that a future time will help bring us relief from this unlawful spying presence. However, if no relief is ever available, **I am still happy to publicly document this as a warning to humanity of the extent to which the USA government has fallen and as an alert to conduct your lives accordingly**.

(**Satan is watching us all in our home in an effort to find something to use against us as a lifelong extortion to enslave us to its demands**. Nothing could be more true, nor more terrifying to learn about the world. I assure you that we are keenly aware of this fact and will be living the life of a pious monk from here to eternity. I suggest that you all do the same.)

If you did not already know: While you sit inside of your homes watching the people on the television screen, **the people on the television screen are watching you** - even closer, and with more evil intentions than you could ever imagine.

I am receiving additional agitation and advancement of the following image (the original image that I was search for was unfound and the 'spying presence' of this raping demon is not patient enough for me to find what I am looking for - anything that it can use to display its power is good enough for it to start again).

I am serious, **the people that are running the United States government are not people that should be respected, admired, or in power at all**. I am being exposed to a very darkened and immature state of humanity that spells doom to the future of humanity. **The spirit within the government is clearly desperate, insecure, maniacally obsessed, and absolutely devoid of any moral restraints or values**.

From my perspective, **we are facing a government that is an insane rapist**. Mark my words, they have shown themselves to me and **the people running the United States Military Spying and Surveillance State are absolute trash that should be locked in a dungeon**.

(Your **Big Brother is a murderous rapist**, he is **wearing a disguise**, and he is **hunting people in the community to have as his next victims**.)(Bow-ass and Rock abs are on his mind and you are the flesh and bones that he seeks to satisfy his miserable existence.)
(**I told you the truth**)
